

Village of Williamsville

Water and Sewer

Committee Meeting, August 17, 2009

7:00pm

Committee Meeting Minutes

Trustee Mike Barnett began the meeting at 7:00 pm, with Trustees Mark Esker, and Janice Beyers in attendance. Also present was Public Works Director Kent Thompson.

The meeting was called to discuss the prioritization of repairs to the sanitary sewer system. The committee reviewed the original video report completed in November of 2008. The committee came to the conclusion that the number one priority would be the section of Walnut Street across from the Grain Elevator, followed by the section of North Pine Street.

The committee also came to an agreement that the Village should attempt to borrow video equipment, and video Walnut Street before committing to repairs of the sanitary sewer at Walnut Street.

The committee also discussed widening Walnut Street across from the Grain Elevator in conjunction with the sewer repairs at Walnut Street.

The committee recommended sewer repairs and street widening been done during the summer months as to not interfere with the harvest and school traffic.

The meeting was adjourned at 7:43pm

Michael J. Barnett
Water and Sewer Chairperson
